## XO-MS Intelligent Standard Pallet Wrapping Machine

*Model: XO ms*

## Product Application

1. Wrapping machine for use with LLDPE stretch film, for the stretch wrapping of palletised goods.
2. Secures and protects goods from dust, moisture, pilferage or damage.
3. This pallet wrapping machine is widely used across all industries that require a brake stretch type film wrapper. The XO-MS is a high specification machine with a capacity of around 10 – 20 pallets per hour.

## X-LINE Operation System

1. Features on screen programming and troubleshooting guide with 6 program options.
2. Clear simple operation. Easy maintenance.
3. Password protected operator adjustments to prevent unauthorised modifications.
4. Total pallet counter, and resettable pallet counter for daily / weekly pallet counts.
5. Individual settings for turntable, carriage up and down speeds. Bottom wrap turn count. Top wrap turn count. Pallet overlap timer. Automatic repeat facility to automatically apply extra wraps.

Modern component parts in a neat compact enclosure with solid state printed circuit board, no old technology, relays or switches.

1. Integrated solid state control circuit, for reliable operation, longer life and simplified maintenance.
2. X-LINE Touch Screen.
3. SICK Proximity Switch.
4. AUTONICS Photo-electric Switch.
5. WEIDMULLER Terminal Block.

### Six Memory Functions and One Button Start

1. Six named program memory function to simplify parameter recall.
2. Manual wrapping program for awkward loads.
3. One button start, for more convenient machine operation.

## Efficient Wrapping

1. Film applied with even tension to the full height of the pallet.
2. Variable top and bottom wraps and pallet overlap.
3. No more back breaking hand wrapping or dizzy workers.
4. Guaranteed pallet stability.
5. Every pallet wrapped to exactly the same standard.

## Advanced Safety Technology

Safety device under film carriage to protect the foot or head of the operator. If the trip is actuated the machine will automatically stop, the alarm will sound and lamp illuminate.

The control panel will guide the operator through the reset procedure. The SMART WASP XO-MS is designed with safety in mind.

Mechanical film braked roller ensures the pallet is securely wrapped, with easy in cycle operator adjustment.

## Main Features

1. 1,650 mm Turntable driven by a heavy duty  $\frac{3}{4}$ " chain.
2. 2,200 mm Max wrapping height.
3. 2,000 Kg Max load weight.
4. Variable Braked Roller film stretching for high wrapping efficiency.
5. Comprehensive safety protection system.

## Intelligent LED Light

LED indicator fitted to top of mast.
